### <sup>96</sup>Zr Levels

With a ground state  $Q(2\beta^-)=3347.7$  keV 22 ([2003Au03](#)), there have been many experimental programs to determine the  $2\beta^-$  decay half life of <sup>96</sup>Zr. The adopted value comes from the latest results of the NEMO collaboration. A list of all experimental efforts can be found at [www.nndc.bnl.gov/bbdecay](http://www.nndc.bnl.gov/bbdecay).
